Mr. Christopher Dorow, PE, CFM
Regional Category Manager, Power & Utilities
BASF Corporation
Houston Energy Tower IV
11750 Katy Freeway
Houston, Texas 77079

Re: Termination of the Stage 1 Drought Watch Declaration for Lake Somerville

Dear Mr. Dorow:

Your entity was notified by letter, dated March 10, 2021, of the Stage 1 Drought Watch Declaration associated with Lake Somerville when the Palmer Hydrologic Drought Index, published by the National Oceanic and Atmospheric Administration, dropped below the -2.4 trigger level. The trigger is one of the Brazos River Authority (BRA) Drought Contingency Plan (DCP) criteria used to extend the supply and availability of water during times of drought. Recent rain events have resulted in significant improvements to drought conditions in your area of the basin. With Lake Somerville now full, we anticipate that drought conditions will not return for an extended period.

Therefore, the BRA is terminating the Stage 1 Drought Watch Declaration for Lake Somerville. Should dry conditions materialize once again later this year, BRA will coordinate with you as necessary in accordance with the DCP.

If you have questions, please contact Ms. Cathy Dominquez, Regional Government and Customer Relations Manager for the Lower Basin, at 254-761-3176.

Sincerely,

David Collinsworth
General Manager/CEO
