

Industry Day

East Williamson County Water Treatment Plant

PURPOSE:

The Brazos River Authority will host an Industry Day at the East Williamson County Water Treatment Plant to familiarize the water treatment/water transmission construction community with the mission of the BRA and to showcase our upcoming plant expansion and pipeline construction projects. The planned agenda will include a presentation on the Brazos River Authority; an overview of our upcoming construction projects; a tour of the plant and Granger Lake intake facility; and will conclude with a BRA-provided lunch during a question-and-answer period. We welcome participation from any construction firm authorized to do business in Texas that specializes in constructing water treatment plants and water transmission pipelines.

WHEN: March 18, 2026

TIME: 8:30 am – 1:00 pm

WHERE: In-Person: 201 County Road 496 Taylor, TX 76574
