**BRAZOS RIVER AUTHORITY RESCINDS  
STAGE 2-DROUGHT WARNING  
FOR EAST WILLIAMSON COUNTY REGIONAL WATER SYSTEM AT LAKE GRANGER**

Waco, TX – September 23, 2024 – The Brazos River Authority (BRA) has rescinded the **Stage 2 Drought Warning** for customers accessing potable drinking water from the East Williamson County Regional Water System (EWCRRS). The river authority informed customers accessing potable drinking water from the EWCRRS that due to changes in weather conditions and reduced treated water usage, the **Stage 2 Drought Warning** is no longer necessary.

The **Stage 2 – Drought Warning** was announced on August 21, 2024, after the potable drinking water plant reached the established trigger point of total daily water consumption of ninety percent (90%) of production capacity for three consecutive days. Each customer receiving water from the plant was *required* to help decrease demand on the EWCRRS plant by ten percent (10%) of the water use that would have occurred in the absence of any drought contingency measures.

BRA Customers receiving water from EWCRRS include:

- The city of Taylor,
- Lone Star Regional Water Authority, and
- Jonah Water Special Utility District.

Over the last few weeks, there has been a reduction in total daily water consumption from the EWCRRS plant. The reduced water consumption trend is expected to continue with the transition to fall, cooler weather, and recent rainfall.

The BRA reminds everyone that these extreme conditions are impacting water supplies and urges everyone to do their part by implementing conservation measures as directed by their water provider.

A copy of the Brazos River Authority's Drought Contingency Plan can be found at the following web address [www.brazos.org/DCP](http://www.brazos.org/DCP) or by contacting the BRA at (254) 761-3100.
