Comanche, TX 76442

Re: Implementation of Stage 2 – *Drought Warning* for Lake Proctor

Dear Mr. Sorrells:

The Brazos River Authority (BRA) informed you by letter of the declaration of the Stage 1 – *Drought Watch* for Lake Proctor on March 27, 2026. Since that time, drought conditions have continued to develop, and the elevation of Lake Proctor has dropped below its Stage 2 – *Drought Warning* trigger of 1156.1 feet msl. **As such, the BRA is implementing a Stage 2 – *Drought Warning* condition for Lake Proctor.**

The stated goal in Stage 2 – *Drought Warning* of the BRA Drought Contingency Plan (DCP) is a 10% reduction in water use that would have occurred in the absence of any drought contingency measures. **We ask that you take action consistent with Stage 2 of the BRA DCP to achieve a 10% reduction in water use.**

Additional information on the implementation of the Stage 2 – *Drought Warning* condition can be found on page 6 of the BRA DCP, which is available on BRA's website at <https://www.brazos.org> under "About Us" – "Water Supply" – "Drought" – "Drought Contingency Plan". Current drought information is also located on the website at www.Brazos.org/drought.

The BRA is monitoring water supply and drought conditions within the Brazos River Basin and will notify you when changes under the DCP are made or additional action is required.

If you have questions, please contact Amy Muttoni, Customer Relations Business Manager, at (254) 761-3165.

Sincerely,

DAVID COLLINSWORTH
General Manager/CEO
