Re: Termination of Stage 2 - Drought Warning Condition for the East Williamson County Regional Water System at Lake Granger

Dear Mr. LaBorde:

Your entity was notified of a Stage 2 - Drought Warning declaration for the East Williamson County Regional Water System (EWCRWS) at Lake Granger on August 21, 2026, as a result of the total daily water consumption at the EWCRWS reaching ninety percent (90%) of the EWCRWS' production capacity for a period of three consecutive days. As specified in the Brazos River Authority (BRA) Drought Contingency Plan (Plan), this is one of the triggering criteria for a Stage 2 - Drought Warning Condition at the EWCRWS.

Over the last few weeks, there has been a reduction in total daily water consumption from the EWCRWS plant. The reduced water consumption trend is expected to continue with the transition to fall, cooler weather, and recent rainfall.

Therefore, BRA is rescinding all drought warning declarations for the EWCRWS. BRA will coordinate with you as necessary in accordance with the BRA's Plan as drought conditions change.

If you have questions, please contact Ms. Amy Muttoni, Customer Relations Business Manager for Water Services, at (254) 761-3165.

Sincerely,

DAVID COLLINSWORTH
General Manager/CEO
