Mr. Andrew Bayley
VP Raw Materials Procurement N
BASF Corporation
602 Copper Road
Freeport, Texas 77541

Re: Termination of the Stage 1 – Drought Watch Declaration for Lake Somerville

Dear Mr. Bayley:

Your entity was notified by letter, dated April 3, 2025, of the Stage 1 - Drought Watch Declaration for Lake Somerville when the Palmer Hydrologic Drought Index (PHDI), published by the National Oceanic and Atmospheric Administration, dropped below the -2.4 trigger level. The trigger is one of the Brazos River Authority (BRA) Drought Contingency Plan (DCP) criteria used to extend the supply and availability of water during times of drought. Recent rain events have resulted in significant improvements to drought conditions in your area of the basin. With Lake Somerville now full, we anticipate that drought conditions will not return for an extended period.

As such, the BRA is terminating the Stage 1 – Drought Watch Declaration for Lake Somerville. A Stage 1 – Drought Watch condition remains in effect for Lakes Stillhouse Hollow and Georgetown. If drought conditions re-emerge later this year, we will coordinate with you as necessary under the DCP.

The DCP is available on our website at <https://www.brazos.org> under About Us – Water Supply – Drought – Drought Contingency Plan. Current drought information is also located on the website at <http://www.brazos.org/About-Us/Water-Supply/Drought>.

If you have questions, please contact Amy Muttoni, Customer Relations Business Manager, at (254) 761-3165.

Sincerely,

DAVID COLLINSWORTH
General Manager/CEO
