Mr. Richard English
Manager
Acton Municipal Utility Dist.
6420 Lusk Branch Ct.
Granbury, TX 76049-2035

Re: Termination of the Stage 1 – Drought Watch Declaration for the Brazos River Authority's Reservoir System

Dear Mr. English:

In accordance with its Drought Contingency Plan (Plan), the Brazos River Authority (BRA) informed you by letter of the declaration of the Stage 1 – Drought Watch for the BRA's Water Supply System (System) on August 11, 2022. Due to rainfall over the past several weeks, the combined storage capacity of the System of water supply reservoirs has risen above the Stage 1 trigger. The System includes the following reservoirs: Possum Kingdom, Granbury, Whitney, Aquilla, Proctor, Belton, Stillhouse Hollow, Georgetown, Granger, Limestone, and Somerville. We anticipate that the combined storage capacity will remain above the Stage 1 trigger level for an extended period.

As such, the BRA is terminating the Stage 1 – Drought Watch declaration for the System. A Stage 2 – Drought Warning condition remains in effect for Lake Belton and the Lake Stillhouse Hollow-Lake Georgetown Sub-system, and a Stage 4 – Pro Rata Curtailment condition remains in effect for Lake Proctor. In accordance with the Plan, all drought stages have been terminated for the remainder of the reservoirs in the System. If drought conditions re-emerge later this year, we will coordinate with you as necessary under the Plan.

The Plan is available on our website at <https://www.brazos.org> under About Us – Water Supply – Drought – Drought Contingency Plan. Current drought information is also located on the website at <http://www.brazos.org/About-Us/Water-Supply/Drought>.

We anticipate that the combined storage capacity will remain above the Stage 1 trigger level for an extended period.

As such, the BRA is terminating the Stage 1 – Drought Watch declaration for the System. A Stage 2 – Drought Warning condition remains in effect for Lake Belton and the Lake Stillhouse Hollow-Lake Georgetown Sub-system, and a Stage 4 – Pro Rata Curtailment condition remains in effect for Lake Proctor. In accordance with the Plan, all drought stages have been terminated for the remainder of the reservoirs in the System. If drought conditions re-emerge later this year, we will coordinate with you as necessary under the Plan.

The Plan is available on our website at <https://www.brazos.org> under About Us – Water Supply – Drought – Drought Contingency Plan. Current drought information is also located on the website at <http://www.brazos.org/About-Us/Water-Supply/Drought>.

Mr. Mike Albert
Board President
Sportsman's World M.U.D.
3138 Hell's Gate Loop
Strawn, TX 76475

Re: Termination of the Stage 1 – Drought Watch Declaration for the Brazos River Authority's Reservoir System

Dear Mr. Albert:

In accordance with its Drought Contingency Plan (Plan), the Brazos River Authority (BRA) informed you by letter of the declaration of the Stage 1 – Drought Watch for the BRA's Water Supply System (System) on August 11, 2022. Due to rainfall over the past several weeks, the combined storage capacity of the System of water supply reservoirs has risen above the Stage 1 trigger. The System includes the following reservoirs: Possum Kingdom, Granbury, Whitney, Aquilla, Proctor, Belton, Stillhouse Hollow, Georgetown, Granger, Limestone, and Somerville. We anticipate that the combined storage capacity will remain above the Stage 1 trigger level for an extended period.

As such, the BRA is terminating the Stage 1 – Drought Watch declaration for the System. A Stage 2 – Drought Warning condition remains in effect for Lake Belton and the Lake Stillhouse Hollow-Lake Georgetown Sub-system, and a Stage 4 – Pro Rata Curtailment condition remains in effect for Lake Proctor. In accordance with the Plan, all drought stages have been terminated for the remainder of the reservoirs in the System. If drought conditions re-emerge later this year, we will coordinate with you as necessary under the Plan.

The Plan is available on our website at <https://www.brazos.org> under About Us – Water Supply – Drought – Drought Contingency Plan. Current drought information is also located on the website at <http://www.brazos.org/About-Us/Water-Supply/Drought>.

If you have questions, please contact Jon Dulus, Regional Business & Project Development Manager for the Upper Basin, at (254) 761-3274.
