Re: Implementation of Stage 2 – Drought Warning Condition for the East Williamson County Regional Water System at Lake Granger

Dear Mr. LaBorde:

As specified in the Brazos River Authority (BRA) Drought Contingency Plan (Plan), one of the triggers for the Stage 2 – Drought Warning Condition for the East Williamson County Regional Water System (EWCRRS) at Lake Granger is when the total daily water consumption at the EWCRRS reaches ninety percent (90%) of the EWCRRS' production capacity for a period of three consecutive days. The EWCRRS reached this trigger during the early part of August 2024. **Therefore, the BRA is implementing a Stage 2 – Drought Warning Condition for the EWCRRS.**

The stated goal of a Stage 2 – Drought Warning in the BRA Plan is a required ten percent (10%) reduction in water use that would have occurred in the absence of any drought contingency measures. **We ask that you take action consistent with Stage 2 of the BRA Plan to achieve a ten percent (10%) reduction in water use.**

Additional information on the implementation of the Stage 2 – Drought Warning Condition can be found on pages 6, 10, and 11 of the BRA Plan, which is available on our website at <https://www.brazos.org> under About Us – Water Supply – Drought – Drought Contingency Plan. Current drought information is also located on the website at <http://www.brazos.org/About-Us/Water-Supply/Drought>.

The BRA is monitoring water supply and drought conditions within the basin and will notify you when changes under the Plan are made or additional action is required.

If you have questions, please contact Amy Muttoni, Regional Customer Relations Business Manager for the Central and Lower Basins, at (254) 761-3165.

Sincerely,

DAVID COLLINSWORTH

Re: Implementation of Stage 2 – Drought Warning Condition for the East Williamson County Regional Water System at Lake Granger

Dear Mr. Brown:

As specified in the Brazos River Authority (BRA) Drought Contingency Plan (Plan), one of the triggers for the Stage 2 – Drought Warning Condition for the East Williamson County Regional Water System (EWCRRWS) at Lake Granger is when the total daily water consumption at the EWCRRWS reaches ninety percent (90%) of the EWCRRWS' production capacity for a period of three consecutive days. The EWCRRWS reached this trigger during the early part of August 2024. **Therefore, the BRA is implementing a Stage 2 – Drought Warning Condition for the EWCRRWS.**

The stated goal of a Stage 2 – Drought Warning in the BRA Plan is a required ten percent (10%) reduction in water use that would have occurred in the absence of any drought contingency measures. **We ask that you take action consistent with Stage 2 of the BRA Plan to achieve a ten percent (10%) reduction in water use.**

Additional information on the implementation of the Stage 2 – Drought Warning Condition can be found on pages 6, 10, and 11 of the BRA Plan, which is available on our website at <https://www.brazos.org> under About Us – Water Supply – Drought – Drought Contingency Plan. Current drought information is also located on the website at <http://www.brazos.org/About-Us/Water-Supply/Drought>.

The BRA is monitoring water supply and drought conditions within the basin and will notify you when changes under the Plan are made or additional action is required.

If you have questions, please contact Amy Muttoni, Regional Customer Relations Business Manager for the Central and Lower Basins, at (254) 761-3165.

Sincerely,

DAVID COLLINSWORTH
