

## Current Reservoir Summary Status – June 22, 2022

The table below summarizes the status of each reservoir as of June 22, 2022.											
<b>THIS COLOR = STAGE 1 DROUGHT WATCH CONDITION</b> <b>THIS COLOR = STAGE 2 DROUGHT WARNING CONDITION</b> <b>THIS COLOR = STAGE 3 DROUGHT EMERGENCY CONDITION</b> <b>THIS COLOR = STAGE 4 PRO-RATA CURTAILMENT CONDITION</b>				<sup>5</sup> Stage 1 Drought Watch Trigger Level		Stage 2 Drought Warning Trigger Level		Stage 3 Drought Emergency Trigger Level		Stage 4 Pro-rata Curtailment Trigger Level	
Reservoir	June 22, 2022 Elevation	June 22, 2022 Capacity (acre-feet)	% Full	Elevation	Capacity (acre-feet)	Elevation	Capacity (acre-feet)	Elevation	Capacity (acre-feet)	Elevation	Capacity (acre-feet)

<sup>1</sup>Lakes Possum Kingdom, Granbury, and Whitney are operated together as a sub-system as are Lakes Stillhouse Hollow and Georgetown. As such, the Drought Trigger Levels are based on the collective capacity of the reservoirs.

<sup>2</sup>Capacity and Percent Full values shown in the table are for the BRA storage in Lake Whitney. The current total capacity of Lake Whitney is approximately 526,051 acre-feet, which is 85 percent full.

<sup>3</sup>Water is currently being transferred from Lake Stillhouse Hollow to Lake Georgetown through the Williamson County Regional Raw Water Line (WCRRWL) at a rate of 126 acre-feet per day (about 41 mgd).

<sup>4</sup>Lake Georgetown has triggers independent of Stillhouse Hollow that are based on WCRRWL pumping operations. The triggers are as follows: Stage 1 Trigger = 6 months or more of sustained pumping; Stage 2 Trigger = 18 months or more of sustained pumping; Stage 3 Trigger = when the BRA's GM/CEO or his/her designee determines hydrologic conditions are as severe as or worse than the driest 24-month period on record; Stage 4 Trigger = when deemed appropriate by the BRA's GM/CEO or his/her designee due to disruption in WCRRWL pumping operations.

<sup>5</sup>In addition to elevation and storage trigger levels, and the Lake Georgetown trigger, the Stage 1 drought condition may also be initiated for a reservoir/reservoir sub-system when the Palmer Hydrological Drought Index (PHDI) is equal to or less than -2.4.
